Dear Parent or Guardian:

Enclosed within this packet you will find the forms and information that pertain to Kindergarten enrollment for the Culver Community Schools Corporation for the 2017-18 school year. Please take time to review this information and return the forms **no later than the first day of Kindergarten on August 2, 2017.**

The Kindergarten teachers have provided a list of skills that your child should be able to independently complete before entering Kindergarten. Learning these skills will help make the transition from home to school more enjoyable and will provide a solid foundation for academic success for your child.

**Indiana Law requires that all children be immunized to enter school.** Parents must provide a written record to show proof that immunizations have been completed or are in the process of completion. The only exceptions to this are children for whom the immunizations are medically contraindicated or children whose parents have filed a written statement of religious objection. **Proof of immunization must be provided by the first day of school.** Physical and dental exams are recommended because it is important for your child to start school in good health. **A complete eye exam by an eye professional is a requirement by Indiana law** and is necessary in order to screen for any vision problems.

This packet is being provided at Kindergarten Round-Up so that you have a few months to work with your child on fundamental kindergarten skills, get required immunizations, health exams and forms completed before school starts. If you are unable to register your child at Kindergarten Round-Up, please complete and return these forms to the Elementary or you will be required to register your child during the assigned registration hours this summer at Culver High School.

---

Culver Elementary School, in partnership with parents and community, is committed to nurturing and educating our children to achieve their personal best. Within a safe, supportive environment we will strive to prepare each student to become a contributing member of society and a lifelong learner.
