Pesticide Application Registry Notice

Dear Parent, Guardian, or Staff Member:

Culver Community Schools Corporation practices Integrated Pest Management, a program that combines preventive techniques, non-chemical pest control methods, and the appropriate use of pesticides with a preference for products that are the least harmful to human health and the environment. Applications of pesticides are made only when deemed necessary to control a pest after trying other means to control the problem. The team “pesticide” includes insecticides, herbicides, rodenticides, and fungicides.

We are establishing a registry of people who wish to be notified prior to pesticide applications. To be included in this registry, please complete the attached form and submit it to your child’s school office or to the Culver Community Schools Corporation Administrative Office, located at 700 School St., Culver, IN 46511. Individuals will be notified via email of upcoming applications. This application must be completed annually to remain on the registry list.

Please include me in the Pesticide Application Notification Registry. I understand that if there is an immediate threat to health or property that requires treatment before notification can be sent, I will receive notification as soon as practicable.
